

Farmers Digging Deeper

Analysis of soil carbon & soil pH on 119 farms in Gippsland

Presenters:

Chris Alenson is a renowned ag scientist who has been an amazing contributor to sustainable agriculture for many decades. Chris will be talking about soil pH and calcium, and highlight key findings from the 119 farms participating in this program.

Peter Ronalds took over 550 soil carbon samples from 119 farms as part of this project. He will talk about soil carbon, the results obtained, and what the key learnings were.
